

1 **Abstract of Disclosure**

2 A holding and dispensing apparatus is provided for use with a pack. The
3 holding and dispensing apparatus includes a holding device for holding
4 the pack and a dispensing device for dispensing beverage from the pack.
5 The holding device includes a clamp for clamping the pack and a handle
6 attached to the clamp. The clamp includes a first jaw for contact with
7 the top of the pack and a second jaw for contact with the bottom of the
8 pack. The first jaw is connected with the second jaw so that a distance
9 between them is adjustable. Thus, the clamp can clamp packs of
10 different heights. The handle is attached to a plate extending from the
11 second jaw.
